Misunderstandings

Global Collaboration = Cultural and Virtual Competence

We have worked with hundreds of teams and thousands of professionals to improve how they engage with their international colleagues. One of our popular programs is the online 3x3 Program, designed for virtual colleagues to build trust, learn from each other and create new practices for improved collaboration.

FROM:

"They are the problem."

TO:

"We are the solution."

OUTCOMES

- Awareness of the impact of culture on their collaboration. Insights into the cultural influences on themselves and their colleagues.
- Practices to build psychological closeness with the colleagues.
- Increased levels of trust and team spirit. Enthusiasm to collaborate internationally to reach their shared goals together.
- Virtual practices to improve team connection and performance.

"We used to think of them as the enemy. Now we think we can work together."
